

Glazing adhesives

Liqui Moly brand products

Liquifast 1402

Liquifast 1502

Liquifast 1599

...are recognized systems for the professional glazing of windshields, side and rear windows of all current vehicle models. These products are also identically used in the original equipment of various OEM automotive manufacturers. In addition, we have received approval from DaimlerChrysler for the Liquifast 1502 product (approval number GGA-ID 30094).

Glazing adhesives Liquifast 1402 and 1502 have received technical certificate no. 375-017-01 FBFS from the TÜV Automotive GmbH (Germany's national technical inspection agency) and passed a crash test with respect to U.S. standard FMVSS20.

As a manufacturer and distributor of a comprehensive line of automotive chemicals, Liqui Moly takes pride in offering products that exude the best possible quality and safety. You can use Liqui Moly glazing adhesives to repair all common vehicle models, knowing that the most demanding quality requirements of your customers will be fulfilled.

Each product is to be used in a system-compatible manner (i.e. in conjunction with the associated cleaner and thinner, primer and/or activator components) in accordance with the work instructions. You will find helpful calculation software with an adhesive recommendation for each vehicle on our German homepage under the heading www.liqui-moly.de "Autoglas-Info".

You can find out about the "Liqui Moly Windshield Replacement Specialist" partner concept from your dealer or sales rep at any time.
